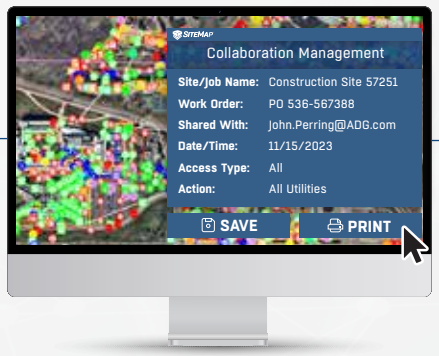
SITEMAP® PRO

CONTROL DATA CONTROL DAMAGE

ACCURATE & AGGREGATED

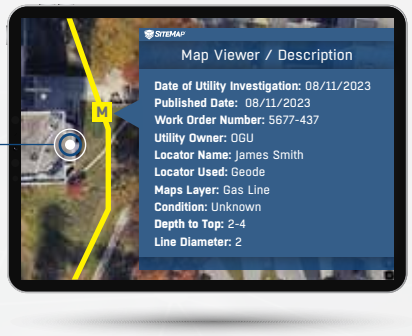
Campus, facility or distributed assets all receive GPRS' **99.8% subsurface visualization accuracy, aggregated to provide an instant snapshot – past, present & future** – secured in one centralized, accessible database.

AS BUILTS: DIGITIZED, LAYERED, & EASY-TO-READ



Layered, mapped, and cross-referenced subsurface data that can be updated as needed to ensure **accurate subsurface as builts to see you through planning, prefabrication, and construction, all the way through operations & maintenance.**

COLLABORATION REDEFINED



You decide the number of users, their level of access, and how your data is used. From historical data through current as builts, **you can put the right information into the right hands exactly when they need it.**

SITEMAP® PRO GIVES YOU WHAT YOU NEED TO MANAGE YOUR SUBSURFACE INFRASTRUCTURE FROM ANYWHERE BY SECURING AGGREGATED, MAPPED & LAYERED DATA – FROM PRE-PLANNING THROUGH O&M AND BEYOND – WHETHER FOR ONE FACILITY OR AMONG DISTRIBUTED ASSETS.

GATHER, SECURE & SHARE YOUR AGGREGATED INFORMATION WITH A SINGLE SOURCE OF TRUTH
